

CJS ENGINEERING LTD

COMPANY PROFILE

CJS Engineering was established in 1988 to provide design and draughting services to the engineering industry.

We have a team of experienced and committed staff skilled in:

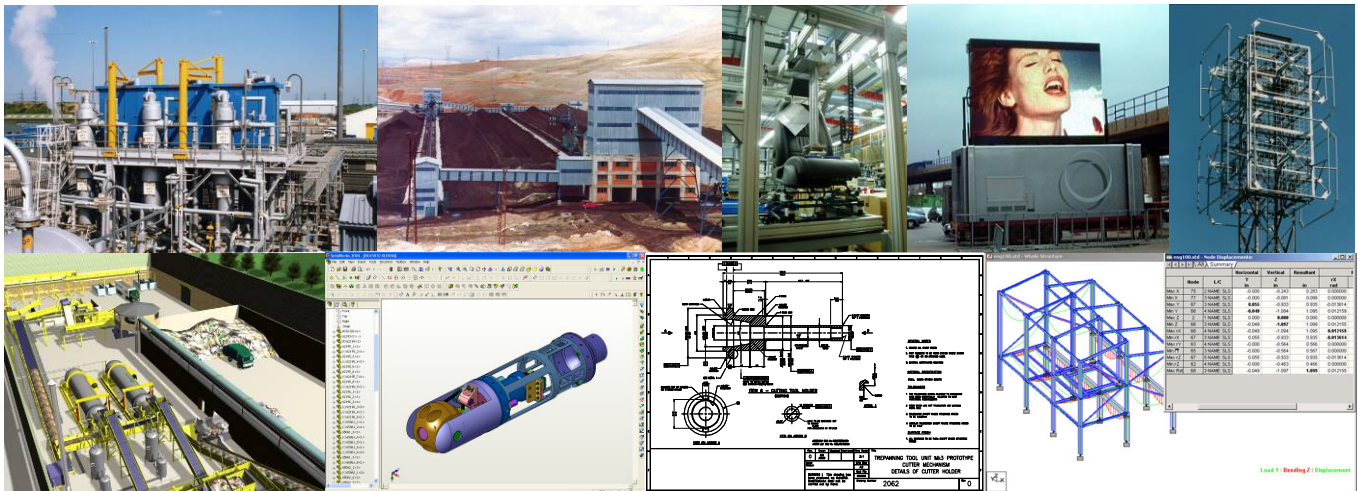

Structural & Mechanical design, 3D CAD modelling, 2D CAD layout & detailing, plus other technical roles such as site surveying, project management, technical report writing and CAD tracing.

Typical industries served include:

Materials handling, nuclear & power generation, automotive equipment, building services, structural & civil, food & pharmaceutical, special purpose machinery, mechanical plant, process & pipework, and research & development.

Our staff can work in-house at our office in Gloucester, on-site at the client's office, or a combination of both. This means you have full flexibility and access to skilled resources as and when you need them.

We have completed over 2000 jobs for approximately 150 different clients, and are determined to successfully interpret your requirements and deliver high quality designs & drawings, on time and within budget.

Facilities and resources:

- 2500 ft² open-plan office with project meeting rooms and area for study of samples & products.
- 18 fully networked CAD stations, all with AVG anti-virus software and Microsoft Office suite.
- CAD software includes Autocad, Solid Works, Inventor, Solid Edge, Microstation, Rastercad, Autotrack
- Design (stress analysis) software includes StaadPro, Mathcad, CADS Analyse 3D, Masterseries
- Employ 24 to 30 design staff
- Sales turnover of approx £900,000 to £1,000,000
- ISO 9001 Quality Assured and Health & Safety Manual
- Professional Indemnity Insurance to £1,000,000
- Technical staff agency with access to database of engineers, often able to provide key staff within hours of a request due to our in-house operations.
- Clients include British Energy, Unilever, BNFL, Honda, Spirax Sarco, Lorne Stewart, RWE Npower, Redler, Kvaerner, Rowecord, Alan Dick, Smiths Aerospace, Excel Automation, Corus, Daifuku, and many others.
